

Transport Plus

The stackable transport cases system for a practical transport and storage of the tools.

The new range of stackable carrying cases allows to transport several machines at once in a easy and safe way. They also protect the machines in a efficient way the tools when not in use. Equipped with a solidly made fixing system with automatic centering. The cases, once stacked, made a solid assembly very easy to transport. The cases are very resistant and light thanks to the manufacturing technology.

Novelty
